7th IMPRS Topics Workshop “Economics meets Psychology”
Wroclaw, September 23.-24., 2013

The 7th Topics Workshop of the IMPRS Uncertainty, titled “Economics meets Psychology”, was held at Wroclaw from September 23rd till 24th. This workshop was co-organized by the the Interdisciplinary Center for Applied Cognitive Studies (ICACS) and the Center for Research on Economic Behavior, University of Social Sciences and Humanities (SWPS). Meeting point was the University of Social Sciences and Humanities (SWPS), Wroclaw Campus.

After the arrival on Sunday, September 22nd, the program on Monday morning started with a welcome by the local organizers (represented by Szymon Wichary) and one of the speakers of the IMPRS Uncertainty (Oliver Kirchkamp). The first session was dedicated to “Modeling bounded rationality: the two cultures”. Konstantinos Katsikopoulos hosted this round table discussion on the different approaches to bounded rationality from different perspectives. The workshop went on in the lab of the University. Sandra Andraszewicz from the University of Basel showed “Modeling decision making under risk using Matlab”. This was a more practical lesson and the students had several exercises to solve. After the lunch break, two talks by members of the Center for research on Economic Behavior in Wroclaw followed. Those talks were round up by another practical session using SPSS on Mediation and Moderation in the lab. Then Remigiusz Szczepanowski talked about “Threshold model of consciousness: evidence from masking studies with emotional faces. During the rest of the afternoon the students of the IMPRS Uncertainty had the chance to present their work to the audience.
Tuesday morning started with a talk by Szymon Wichary from the Interdisciplinary Center for Applied Cognitive Studies. He first introduced the research at his center and went on with his own work on “Probabilistic inferences under emotional stress: how arousal impacts decision processes”. Before lunch, Rafał Albiński showed “how to measure prospective memory – a methodological overview of different approaches”. The afternoon was again dedicated to the students of the IMPRS Uncertainty. Overall, seven PhD students used the opportunity to present their studies during this workshop and received useful feedback for their future work.

In the evening, all participants of the workshop met at Mleczarnia Pub where the scientific and also other discussions were continued. Although there was little time, most of the IMPRS Uncertainty members used that spare time to get to know the city and were really impressed by its historical buildings, churches and small details.
List of Participants 7th IMPRS Topics Workshop „Economics meets Psychology“

PhD students

Anjum, Gulnaz  
Friedrich Schiller University of Jena, Psychology
Davidovic, Stojan  
MPI for Human Development, Berlin
Farjam, Mike  
Friedrich Schiller University of Jena, Economics
Hermstrüwer, Yoan  
MPI for Collective Goods, Bonn
Jarecki, Jana  
MPI for Human Development, Berlin
Kaczmarek, Magdalena  
MPI of Economics, Jena
Kandul, Serhiy  
MPI of Economics, Jena
Lyhs, Laura  
Friedrich Schiller University of Jena, Economics
Marcin, Isabel  
MPI for Collective Goods, Bonn
Nikolaychuk, Olexandr  
MPI of Economics, Jena
Okvitawanli, Ayu  
Friedrich Schiller University of Jena, Psychology
Panganiban, Marian  
MPI of Economics, Jena
Prömpers, Henning  
Friedrich Schiller University of Jena, Economics
Rosenauer, Martin  
MPI for Human Development, Berlin
Tan, Jolene  
MPI for Human Development, Berlin
Toader, Andra  
Friedrich Schiller University of Jena, Psychology
Werner, Benedikt  
MPI of Economics, Jena
Ziolkowska, Monika  
MPI for Collective Goods, Bonn / University of Bonn

Faculty

Büchner, Susanne  
MPI of Economics, Jena
Cantner, Uwe  
Friedrich Schiller University of Jena, Economics
Güth, Werner  
MPI of Economics, Jena
Katsikopoulos, Konstantinos  
MPI for Human Development, Berlin
Kirchkamp, Oliver  
Friedrich Schiller University of Jena, Economics
Levinsky, René  
MPI of Economics, Jena
### Detailed Schedule

**Sunday, September 22\(^{nd}\)**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
</table>
| 9:00 – 9:15 | **Szymon Wichary, Oliver Kirchkamp**  
Welcome and Introduction |
| 9:15 - 11:00 | **Konstantinos Katsikopoulos**,  
Modeling Bounded Rationality: The Two Cultures |
| 11:00 - 11:30 | **Coffee break** |
| 11:30 – 13:00 | **Sandra Andraszewicz**,  
Modeling Decision Making under Risk |
| 13:00 - 14:00 | **Lunch** (at the University mensa, on your own expenses) |
| 14:00 - 14:25 | **Agata Gąsiorowska**,  
The role of money in interpersonal regulation |
| 14:25 - 14:45 | **Jakub Traczyk**,  
Stress as a mediator of the relationship between affect-laden imagery, risk perception and risk taking |
| 14:45 - 15:00 | **Coffee break** |

**Monday, September 23\(^{rd}\)**

<table>
<thead>
<tr>
<th>Time</th>
<th>Session</th>
</tr>
</thead>
</table>
| 15:00 – 16:00 | **Agata Gąsiorowska & Jakub Traczyk**,  
Mediation and moderation analysis workshop  
(at the computer lab – room no 41) |
| 16:00 - 16:45 | **Remigiusz Szczepanowski**,  
Threshold model of consciousness: evidence from masking studies with emotional faces |
16:45 – 17:15  Coffee

17:15 – 17:45  Jana Jarecki and Jolene Tan,
Process models in economics vs. psychology

17:45 – 18:30  Stojan Davidovic,
Analogy as a tool of scientific discovery: a study in the history of economics

Tuesday, September 24th

9:00 – 9:15  Szymon Wichary,
Research at the Interdisciplinary Center for Applied Cognitive Studies

9:15 – 10:00  Szymon Wichary,
Probabilistic inferences under emotional stress: how arousal impacts decision processes

10:00 - 10:45  Max Bielecki,
The usefulness of hierarchical linear models in analyzing cognitive and psychophysiological data

10:45 - 11:15  Coffee break

11:15 - 12:00  Rafał Albiński,
How to measure prospective memory - methodological overview of different approaches

12:00 – 13:30  Lunch (at the University mensa, on your own expenses)

13:30 – 14:00  Ayu Okvitawanli,
Exploring the relationship between implicit/explicit motives and decision styles
14:00 – 14:30  Mike Farjam,  
Towards a smarter grid - What energy producers and consumers can learn from public good games

14:30 – 15:00  Coffee break

15:00 - 15:30  Yoan Hermstrüwer,  
The Torn Veil of Privacy. An Experiment on Privacy Fears, Chilling Effects and the Right to Be Forgotten

15:30 – 16:00  Olexandr Nikolaychuk,  
Speed of Learning as Function of Control in Games of Incomplete Information

16:00 – 16:15  Wrap-up

19:00 -  
Socializing in Wrocław, Mleczarnia Pub

Wednesday, September 25th
